

With XM I can listen to all radio weather reports and be able to ship my customer's product more efficiantly as I can find out about potential weather hazards before I drive into them. Living in Flordia and being a truck driver I am away from home alot and I worry about huricanes with my wife who is there alone and ill and with XM I do not have to worry about her and the weather as much as I can find out what the weather is for myself.

Respectfully,
Rex Wilson
